SKILLS

FRONTEND: HTML, CSS, JavaScript (ES6) | React | Redux | Context
BACKEND: Node | Express | SQL | Knex | PostgreSQL

PROJECTS

JustPost8 | FULLSTACK   GitHub

A fully functional post-sharing web app with neumorphism design
HTML, CCS, JS | React | Redux | Node | Express | PostgreSQL
- User can register, login, and post contents to a public wall
- Consumes the RESTful backend API
- All functionalities implemented including state persistence and form validations

Potluck Planner API | BACKEND   GitHub

A five-table relational database for a "potluck planner" web app
Node | Express | Knex | PostgreSQL
- Includes endpoints for users, potlucks, foods, guests, and combinations
- Having five tables provide flexibility of data shape for frontend consumption
- Added JWT token authentication for restricted endpoints

RENT-A-GAME | FRONTEND   GitHub

Rental store where people can browse games for rent
HTML, CSS, JS | React | Redux |
- Consumes RESTful API with axios
- Shopping cart capability is built and functional

EXPERIENCE

Fred Meyer, Sandy OR   March 2020 - Present
